## Fresher Java Backend Developer

☎ 0978275054 ✉ phamvansy204@gmail.com 🌐 <https://www.linkedin.com/in/syvan2004>

### OBJECTIVE

I can build backend services using Java and Spring Boot, develop RESTful APIs, and work with SQL and NoSQL databases using Hibernate/JPA. I am eager to contribute to real projects and grow as a Java Backend Developer.

### EDUCATION

**Ho Chi Minh City University of Technology (HUTECH)** - major: Software Engineering  
GPA: 3.27/4.0

2022 - 2026

### WORK EXPERIENCE

**Amethyst Medical Việt Nam** - Backend Developer

Sep 2025 - Nov 2025

- Designed and implemented database structures using MySQL.
- Developed RESTful APIs using Spring Boot and MySQL.
- Integrated JWT authentication and identity security, Google and Facebook authentication

**LEAD AND AIM TECHNOLOGY SOLUTIONS** - IT Support

Jun 2025 - Sep 2025

- Redesigned and optimized the company's website using WordPress, improving user experience and content management efficiency.
- Conducted testing and evaluation of barcode scanners, ensuring accuracy, reliability with company requirements
- Represented the company as part of the exhibition team at a major event, enhancing brand visibility and customer engagement

### SKILLS

Technical Skills

**Programming Language:** Java

**Backend Concepts:** OOP, Spring Boot, RESTful API Design, Authentication (OAuth2, JWT), Spring Cloud Gateway, JPA, Socket, Redis Cache

**Databases:** MySQL, MongoDB, NEO4J

Languages

Vietnamese

English

### PROJECTS

**Blur – Social Media Platform**

(Nov 2024 - Jun 2026)

|                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
